

I had a chance to read the working group section I Participated in. The document is thorough and as for content English language is writers and reader choice.

My only suggestion is to provide a better outline in that document summarizing succinctly that which you are about to read. As large as this document is many people will want to see what each section discusses quickly at a glance. Overall very impressed by the thoroughness of the document.

Dominic

Thanks for roping me in on this project. Well done!

Best

Rich
